

# Research Participants Needed

Are you a mental health professional working with individuals with suspected FASD or known prenatal alcohol exposure who are suicidal?

We want to hear from you!

We are conducting a research study to better understand how you are supporting individuals with FASD who are suicidal. We want to know whether you feel prepared to support suicidal persons with FASD and what you are currently doing in your work.

We invite you to complete a short ~10-15-minute anonymous, online survey to help us better understand whether you feel prepared to support suicidal persons with FASD and what you are currently doing in your work.

If you know any other mental health professionals who you think may want to participate in this study, please share this link with them as well.
